

IEEE YESIST2

SPECIAL TRACK

General Presentation Instructions

Each team has been allotted **9 minutes for presentation and demonstration**.

The **presentation and demonstration must be completed within the allotted 9 minutes**. Teams are requested to plan accordingly and cover the key aspects of their project, including the problem statement, proposed solution, innovation, prototype/working model, demonstration, results/impact, and future scope, as applicable.

Teams may divide the presentation and demonstration among multiple team members; however, the complete presentation must remain within the allotted duration.

Please keep a backup copy of your presentation, videos, supporting materials, and demonstration files readily available.

All presentation timings mentioned in the attached schedule are in WIB – Western Indonesian Time (Jakarta time).

For Online Teams

Online teams are requested to:

- Join at least 10 minutes before the allotted presentation slot and remain ready when called.
- Ensure a stable internet connection, working microphone and camera, and proper screen-sharing facility.
- Test the presentation, screen sharing, audio, video playback, software demonstration, and prototype demonstration, wherever applicable, in advance.
- If demonstrating a hardware prototype remotely, position the camera appropriately so that the jury can clearly view the working model.
- Keep the complete technical setup ready before the allotted slot. Setup time will not be provided as additional presentation time.

The online meeting link and further joining instructions will be communicated separately.

For In-Person Teams

In-person teams are requested to:

- Ensure that the complete presentation/prototype demonstration (Video/Actual Hardware) setup is ready before entering the evaluation area.
- Carry all necessary equipment required for their presentation or demonstration, including the prototype, if being carried, laptop, chargers, adapters, cables, and any other required equipment.
- Preload and test any videos or supporting media in advance.

- Avoid using presentation time for setting up equipment.
- Follow the instructions of the volunteers/coordinators regarding the waiting area, movement, and entry into the evaluation area.

Teams are requested to review both attached documents carefully and be available well before their scheduled presentation slot to ensure the smooth conduct of the evaluation.
